SUMMARY

I am a passionate student pursuing Artificial Intelligence and Machine Learning, with a strong interest in data science. I am driven by a curiosity to explore how intelligent systems can leverage data to solve complex real-world problems. I am particularly drawn to the intersection of AI and data science because of its potential to transform industries by automating processes, uncovering insights, and making informed decisions. I am eager to contribute to innovative projects and further enhance my skills in these dynamic fields.

EDUCATION

Dwarkadas Jivanlal Sanghvi College of Engineering **2023 – 2027**
Btech In Artificial Intelligence & Machine Learning

K. J. Somaiya Science and Commerce **2021 – 2023**

INTERNSHIP EXPERIENCE

ROBOKART

Mumbai

Research and Development Engineer Intern **20th June 2024 – 20th July 2024**

- Delivered awareness-based STEM workshops using PPTs, live demonstrations, and hands-on science kits (microscopes, telescopes, electronics modules).
 - Trained college students as part of a Gujarat Government-supported GUJHOST initiative aimed at promoting STEM education among lower-privileged learners.
 - Facilitated practical activities, guided students through experiments, and ensured interactive learning outcomes.
 - Worked onsite across Gujarat under a government-funded project and received daily reimbursement for field activities.
-

PROJECTS

1. Housing Price Prediction Model

Developed an end-to-end machine learning model to predict house prices using advanced preprocessing and feature engineering.

Features: One-hot encoding, categorical-to-numerical conversion, ML pipeline creation, model tuning, scaling, and saving the trained model using Pickle.

2. Customer Segmentation

Applied K-Means clustering to segment customers based on behaviour patterns.

Tech Stack: Python, pandas, scikit-learn, Matplotlib for analysis and visualization.

3. College Enquiry Chatbot

Built an NLP-based chatbot for answering college-related FAQs using intent classification.

Features: TF-IDF vectorization, Logistic Regression/SVM classifier, 6 predefined intents, and structured response retrieval from CSV/JSON.

4. WhatsApp Message Automation

Developed a Python automation script using the Twilio API to schedule and send WhatsApp messages automatically.

Features: Scheduled message sending, personalized text templates, Twilio WhatsApp integration, and automated notifications.

SKILLS

Programming Languages: Python, C, C++, Core Java, JavaScript (Basics)

ML Concepts: Data Cleaning, EDA, Feature Engineering, Model Building, Model Evaluation

ML/DL Frameworks: Scikit-learn, TensorFlow, Keras, PyTorch

Libraries: NumPy, Pandas, Matplotlib, Seaborn, OpenCV

Databases: MySQL

Tools: Git, GitHub, Google Colab, Jupyter Notebook, VS Code

Core CS: Data Structures, Algorithms (Basics), OOP, OS, DBMS, CN

Soft Skills: Logic building, Teamwork, Flexibility, Communication

Other: Prompt Engineering
